## Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

- 1. (Currently Amended) A stand-alone disposable garment having a waist opening and two leg openings, comprising:
  - a liquid-permeable nonwoven material,
- a first side seam extending from the waist opening to a first leg opening; and
- a second side seam extending from the waist opening to a second leg opening;

the garment being substantially free of an absorbent assembly and substantially free of liquid-impermeable material, wherein the garment is a swimwear liner worn beneath swimwear.

2. (Previously Presented) The stand-alone disposable garment of Claim 1, wherein the liquid-permeable nonwoven material is a mesh material.

## Claim 3 (Canceled)

- 4. (Previously Presented) The stand-alone disposable garment of Claim 1, wherein the nonwoven material comprises spunbond polypropylene.
- 5. (Previously Presented) The stand-alone disposable garment of Claim 1, wherein the nonwoven material comprises spunbond polyethylene.
- 6. (Previously Presented) The stand-alone disposable garment of Claim 1, wherein the nonwoven material comprises a spunbond/meltblown/spunbond web combination.

7. (Previously Presented) The stand-alone disposable garment of Claim 1, wherein the liquid-permeable material comprises nylon.

- 8. (Previously Presented) The stand-alone disposable garment of Claim 1 comprising at least two layers of the liquid-permeable material.
- 9. (Previously Presented) The stand-alone disposable garment of Claim 1, wherein the material has a basis weight in a range from about 7 gsm to about 85 gsm.
- 10. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a basis weight in a range from about 14 gsm to about 54 gsm.
- 11. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a basis weight in a range from about 20 gsm to about 41 gsm.
- 12. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a hole size in a range from about 147 microns to about 5810 microns.
- 13. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a tensile strength of at least about 5 pounds of force per 4 inches of material.
- 14. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a tensile strength of at least about 10 pounds of force per 4 inches of material.

15. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a tensile strength of at least about 13 pounds of force per 4 inches of material.

- 16. (Previously Presented) The stand-alone disposable garment of Claim 2, wherein the mesh material has a tensile strength of at least about 19 pounds of force per 4 inches of material.
- 17. (Previously Presented) The stand-alone disposable garment of Claim 1 further comprising a waist elastic.
- 18. (Previously Presented) The stand-alone disposable garment of Claim 1 further comprising a pair of leg elastics.
- 19. (Previously Presented) The stand-alone disposable garment of Claim 18, wherein the leg elastics comprise curved elastics.
- 20. (Previously Presented) The stand-alone disposable garment of Claim 18, wherein the leg elastics comprise straight elastics.
- 21. (Previously Presented) The stand-alone disposable garment of Claim 1 wherein the first and second side seams each comprise a refastenable fastening system extending from the waist opening to each of the first and second leg openings, respectively.
- 22. (Previously Presented) The stand-alone disposable garment of Claim 1 wherein each of the first and second side seams is permanently bonded.

Claims 23-48 (Canceled)

KCC-2136 4 MR/S

49. (Withdrawn) A stand-alone disposable garment liner having a waist opening and two leg openings, comprising:

a liquid-permeable material; and an elastic material at least partially surrounding the waist opening; the garment liner being substantially free of an absorbent assembly and

- 50. (Withdrawn) The stand-alone disposable garment liner of Claim 49, further comprising an elastic material at least partially surrounding each leg opening.
- 51. (Withdrawn) The stand-alone disposable garment liner of Claim 49, wherein the liquid-permeable material comprises a mesh material.
- 52. (Withdrawn) The stand-alone disposable garment liner of Claim 49, wherein the liquid-permeable material comprises a spunbond web.
- 53. (Withdrawn) The stand-alone disposable garment liner of Claim 52, wherein the liquid-permeable material further comprises a meltblown web.
- 54. (Withdrawn) A stand-alone disposable garment liner having a waist opening and two leg openings, comprising:

a liquid-permeable material; and

substantially free of liquid-impermeable material.

an elastic material at least partially surrounding each leg opening;

the garment liner being substantially free of an absorbent assembly and substantially free of liquid-impermeable material.

55. (Withdrawn) The stand-alone disposable garment liner of Claim 54, wherein the liquid-permeable material comprises a mesh material.

KCC-2136 5 MR/S

56. (Withdrawn) The stand-alone disposable garment liner of Claim 54, wherein the liquid-permeable material comprises a spunbond web.

- 57. (Withdrawn) The stand-alone disposable garment liner of Claim 54, wherein the liquid-permeable material further comprises a meltblown web.
- 58. (Withdrawn) A stand-alone disposable garment liner having a waist opening and two leg openings, comprising:

a liquid-permeable mesh material; and

a refastenable fastening system;

the garment liner being substantially free of an absorbent assembly and substantially free of liquid-impermeable material.

- 59. (Withdrawn) The stand-alone disposable garment liner of Claim 58, wherein the refastenable fastening system extends from the waist opening to at least one of the leg openings.
- 60. (Withdrawn) The stand-alone disposable garment liner of Claim 58, wherein the liquid-permeable mesh material comprises a nonwoven material.
